

# META WEAPONS SPREADSHEET

SCRIPT: SCOTTISH TRYHARD V4.1

## In game settings:

To get the best out of all values your in game settings must be 0.05 deadzone, **STANDARD** curve type, 1.0 low and high zoom and within the 5-13 stick sensitivity! Please also copy the values exactly how I put them.

## Entering Anti recoil values:

When looking at the values which have “ V: \_ H: \_ : you will input them into the Legacy anti recoil.

The values with 6 numbers you enter in “ prog ar” “**STANDARD**” in order starting with vstart!

## Adjusting anti recoil

All values may need micro adjustments and to do that:

If gun shoots up → increase V

If gun shoots Down ---> Decrease V

If gun shoots too much to the right → decrease H

If gun shoots too much to the left ---> increase H

## Aim Assist:

Copy the values and they will apply for all profiles!!

## NOTE

The anti recoil is not going to be perfect and you actually want to leave more vertical recoil to get the best out of the aim assist! **PLEASE MAKE YOUR OWN SMALL ADJUSTMENTS TO MAKE IT FEEL AS GOOD AS POSSIBLE!**

## **AIM ASSIST VALUES! INPUT FOR BOTH PROFILES!!!**

TAYLOR V6 ++ ON  
AA type - polar  
Shape - TALL OVAL  
Shape Direction - ON
