

META WEAPONS SPREADSHEET

SCRIPT: SCOTTISH TRYHARD V4.1

In game settings:

To get the best out of all values your in game settings must be 0.05 deadzone, **STANDARD** curve type, 1.0 low and high zoom and within the 5-13 stick sensitivity! Please also copy the values exactly how I put them.

Entering Anti recoil values:

When looking at the values which have “ V: _ H: _ : you will input them into the **POLAR RUMBLE**.

The values with 6 numbers you enter in “ prog ar” “**POLAR RUMBLE**” in order starting with vstart!

Adjusting anti recoil

All values may need micro adjustments and to do that:

If gun shoots up → increase V

If gun shoots Down ---> Decrease V

If gun shoots too much to the right → decrease H

If gun shoots too much to the left ---> increase H

Aim Assist:

Copy the values and they will apply for all profiles!!

NOTE

The anti recoil is not going to be perfect and you actually want to leave more vertical recoil to get the best out of the aim assist! **PLEASE MAKE YOUR OWN SMALL ADJUSTMENTS TO MAKE IT FEEL AS GOOD AS POSSIBLE!**

AIM ASSIST VALUES! INPUT FOR BOTH PROFILES!!!
