RUST SPREADSHEET GUIDE

OVERVIEW:

MUST USE IN GAME SETTINGS
- VIBRATION **ON**
- VIBRATION INTENSITY ON **100%**
- CAMERA SENS X & Y **55**
- CAMERA SENS AIMING **30**
- CAMERA SENS AIMING 1X **30**
- CAMER INERTIA **0**
- BOOST MULTIPLIER **100**
- DEADZONE LEFT **10**
- DEADZONE **10**

If you use any other settings values will be off! If you want your specific settings done you must adjust the values yourself!

Instructions:
- Go to my discord and download the taylordrift proaimv5.3
- If the values are two values " V_ H _" then you must enter them in the"legacy ar"
- If the values have values 5 you must enter them in Progressive
- Follow the video guide and I will go over everything there!

ANTI RECOIL ADJUSTMENT GUIDE

All values may need micro adjustments and to do that:

If gun shoots up → increase V

If gun shoots Down ---> Decrease V

If gun shoots too much to the right → decrease H

If gun shoots too much to the left ---> increase H

I WILL UPDATED GUNS AS TIME GO! PLEASE BE PATIENT! THANKS GUYS

RAPID FIRE = 13 round per sec
